EDUCATION

Bachelor Of Engineering, Electronics and Communication Department

Higher Technological Institute, 10th of Ramadan City, Egypt.
2017 - 2022

Graduation Project
Smart Home Automation Using IOT
Grade: A+

The Project mainly enhances residential homes by integrating smart devices and sensors for improved functionality, convenience, and energy efficiency. Using a smartphone app, users can personalize automation routines, adjust settings, and receive notifications for home events. Smart sensors collect real-time data on environmental conditions, occupancy, and energy usage, which is processed by the smart home hub to trigger actions based on rules and user preferences.

Languages

- Arabic
- English "B2"

Objective

Highly motivated and detail-oriented Front-End Web Developer with a degree in Electronics and Communication Engineering. Possessing a strong foundation in coding and a passion for creating user-friendly and visually appealing websites.
